ABSTRACT

This extensive bibliography contains a listing of 1,095 research topics completed by graduate students in the field of planning during the period 1965-70. Citations are organized into separate sections for dissertations, theses, and thesis alternatives. Within each section, entries are listed alphabetically by author's name. Data for the bibliography were obtained through questionnaires mailed to every graduate department of planning listed in the publication, Education and Career Information for Planning and Related Fields: January, 1971. The number of dissertations, theses, and thesis alternatives from each institution is listed in Table 1. (Author/JG)

INTRODUCTION

The following bibliography contains a listing of 1,095 research topics completed by graduate students in planning during the period, 1965-1970. The bibliography is divided into three sections, doctoral dissertation (Part I), theses (Part II), and thesis alternatives (Part III).

Data for the bibliography were obtained through questionnaires mailed to every graduate department of planning listed in the ASPO-AIP publication, Education and Career Information for Planning and Related Fields: January, 1971. The respective number of dissertations, theses, and thesis alternatives per graduate institution is summarized in Table 1.

Since a list of dissertations and theses is no longer published in professional planning journals, the author intends to compile a supplement to this current bibliography on an annual or biannual basis. The supplement will, of course, be available through the Council of Planning Librarians' series, Exchange Bibliographies.
